SOFTWARE

GROUND VISION™

Ground Vision™

Ground Vision™ is the data acquisition software dedicated to the RAMAC/GPR™ mono- or multi-channel systems. As a Windows™ based software, Ground Vision™ gives you an easy-to-use user interface, file management, printing and other key features. Each measurement and associated settings are stored in files. Filtering can be performed with the measurement or as post-processing. Ground Vision™ software supports GPS logging during measurement.

All radargrams can be printed as such, or post-processed by further software.

System requirements

- Windows 95, 98, 2000 or NT
- 100MHz Pentium processor
- 32MB of RAM
- 30MB free hard disk space
- 800x600 screen resolution
- ECP parallel port (IEEE1284) for optimal data acquisition performance
